

Why are all the members of baseball paid the amount they are?

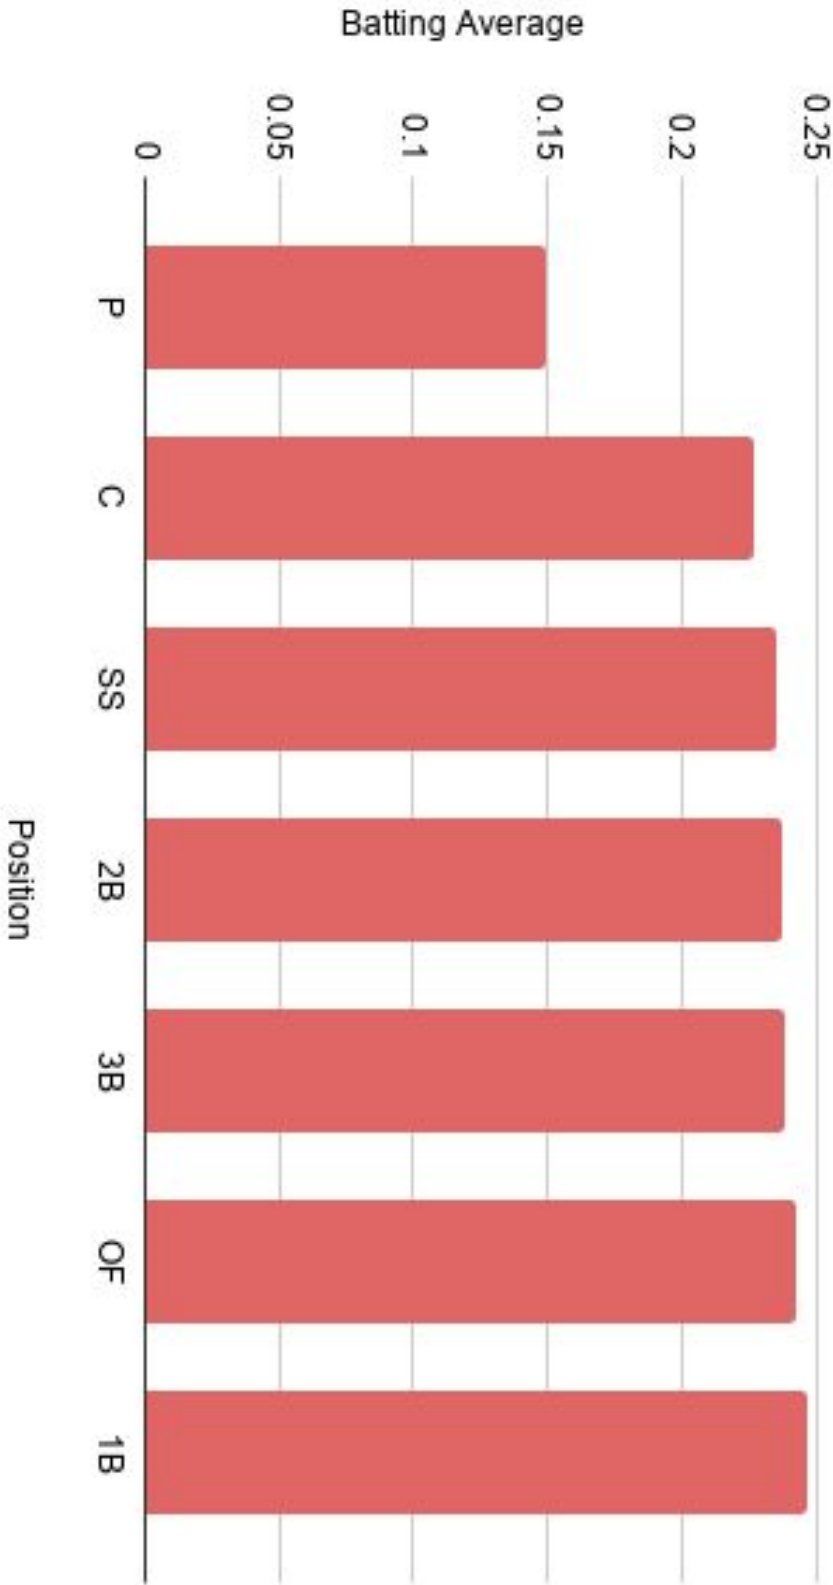

Average Salary by Position Including Manager

First basemen
make the most

Let's find out why by
checking some batting
statistics

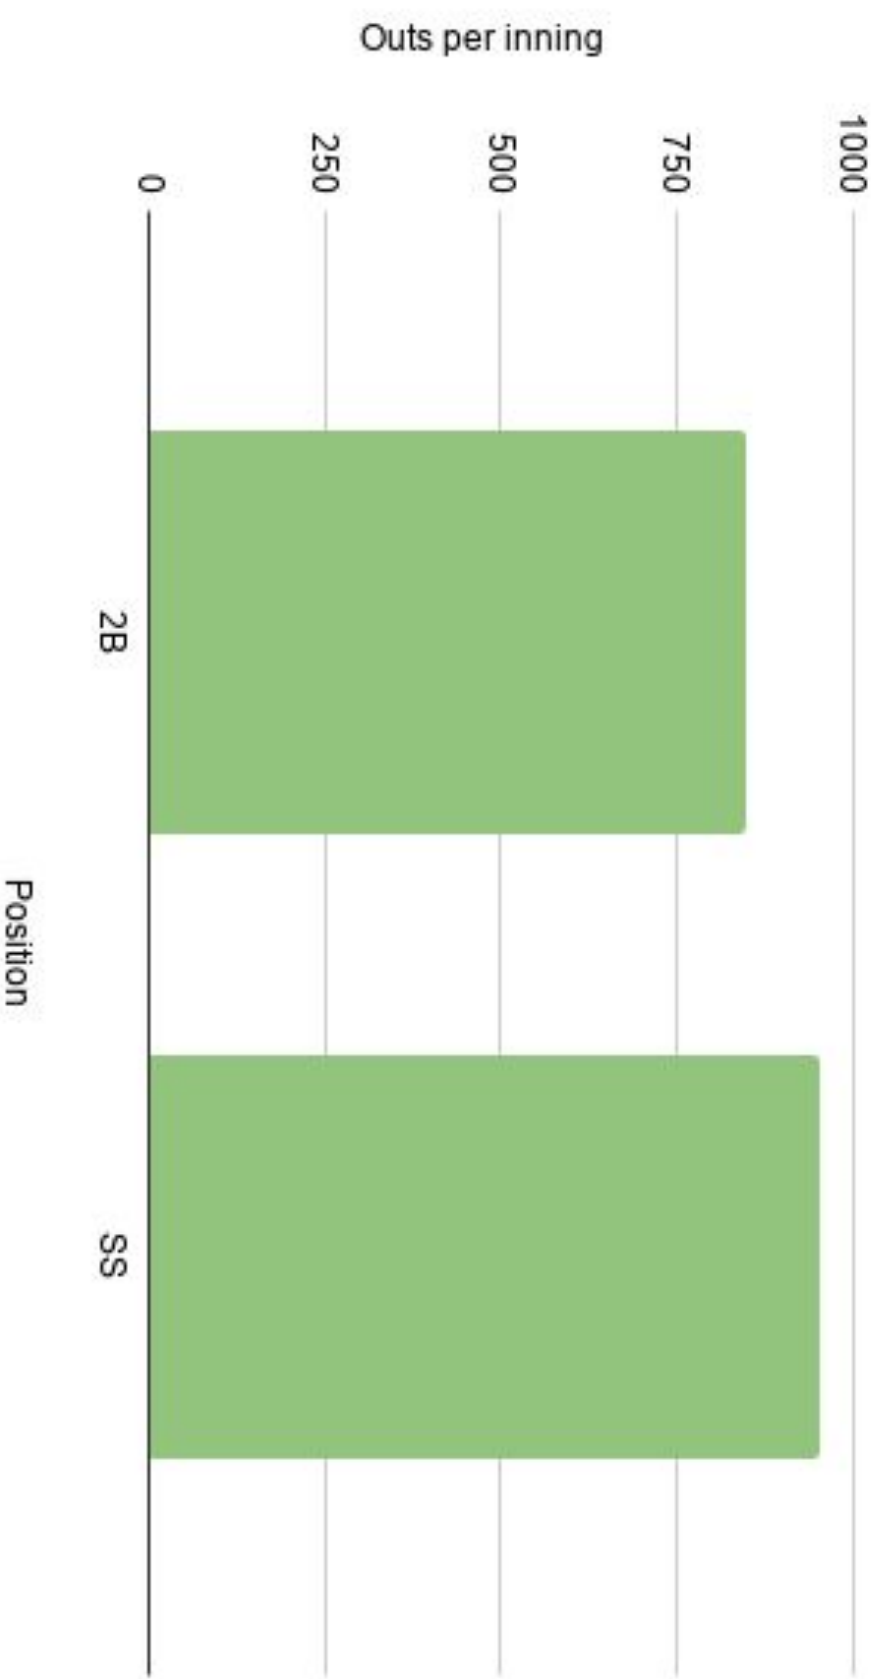

Batting Average for Positions in Major League Baseball

First basemen
appear to have the
highest salary
because they have
the best batting
statistics

Why do shortstops make
more than second basemen
if they have worse batting
statistics?

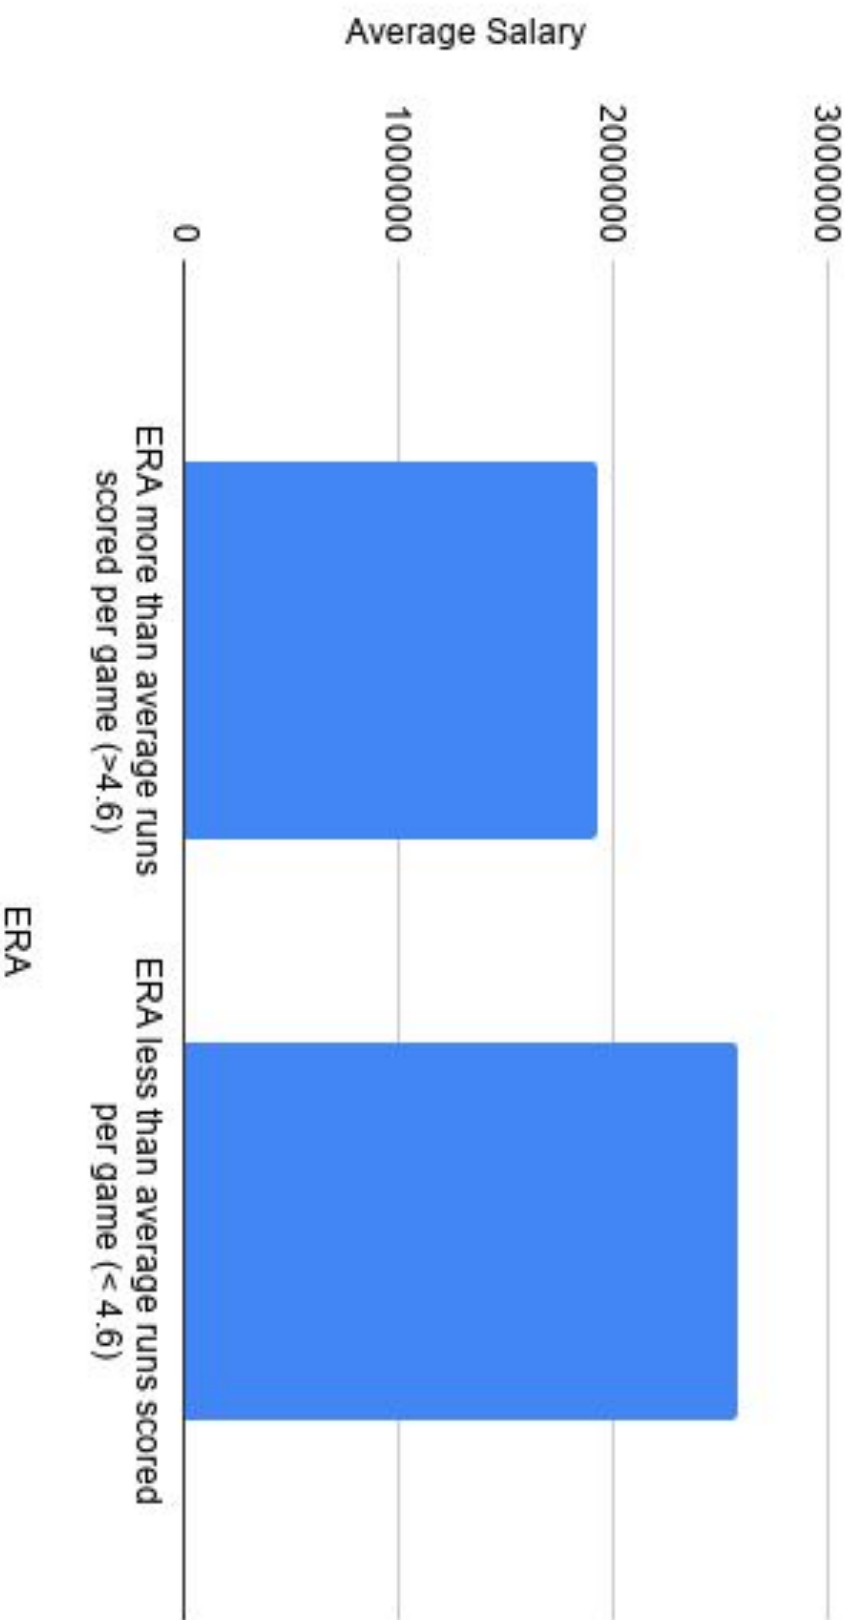

Outs Per Inning by Position

Shortstops have
better fielding
statistics than
second basemen

By having more outs per
inning, shortstops show why
they have a higher salary.

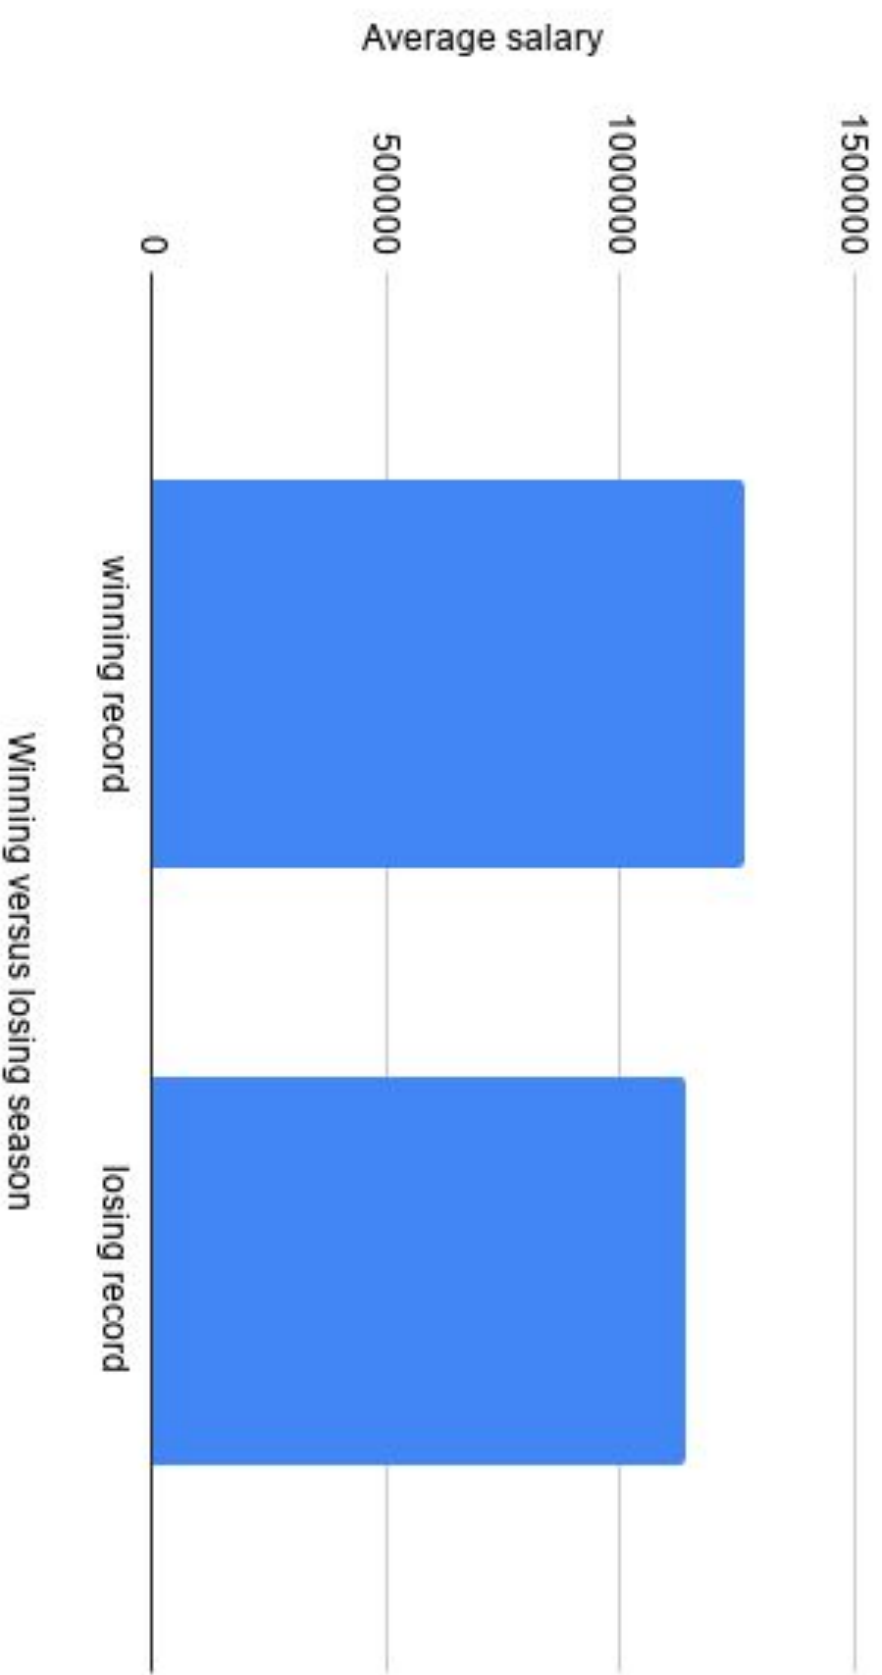

Average Salary By Earned Run Average (ERA)

Pitchers earned
more based on a
better ERA

If they have an ERA below the
average runs scored in a
game then they get paid
more on average.

Average Salary of Team Managers Based on Season Record

Managers make
more money on
average when they
have a winning
season

Let's review all our findings
now

Salary findings

First basemen have the highest salary of any position player because they have the best batting statistics

Shortstops have a higher salary than second basemen because they have better fielding statistics

Pitchers make have a higher salary when their ERA is less than the average runs scored in a baseball game

Managers have a higher salary based on having a winning record
